Fast. Wireless. Compact.

Ark's massive 27,000mAh battery, the largest allowed on commercial flights, transforms the whole world into your office. Its 140W fast-charging can keeps your high-performance laptop alive for your entire flight or rapidly restore three devices at once after a demanding day.

Recharges in a Flash

Ark isn't just a super-fast charger, it's a super-fast recharger. When connected to a 140W USB-C charger, such as the ALOGIC Rapid Power 165W USB-C Car Charger, Ark can be recharged 50% in just 30 minutes, or to 100% in a little over an hour.

All the Info You Need

Ark's screen lets you check exactly how fast devices are charging, how much battery Ark has left and how long it can keep charging at the current speed, helping you plan around the time it takes to recharge.

Fast Charging For Any Laptop

Ark can charge even the most power-hungry high-performance or gaming laptop, capable of delivering up to 140W of USB-C PD 3.1 power. Perfect for demoing your architectural model for clients, killing time on a flight, or keeping your M3 MacBook Pro going while working in a cafe.
