SkinWOW Shot Pro is a non-invasive facial care device that combines RF stamping, EMS micro-vibrations, and LED light therapy. With two operating modes - precise and fluid - it allows for targeted action or treatment of larger skin areas.

The device stimulates collagen production, improves skin firmness, and supports natural regenerative processes, all without pain or discomfort. RF technology activates fibroblasts, micro-vibrations enhance microcirculation, and LED aids in soothing irritations.

Technical specification:

Power: 10 W
Waterproof rating: IPX6
Battery capacity: 1100 mAh
Charging time: 150 min
Battery life: 60 min
Frequency: 1000 KHz (1 MHz)
Included: Device, dust cover, USB Type-C cable
